- PHP Laravel
- Vue.js
- Nuxt.js

- HTML
- CSS
- Tailwind
- Bootstrap

- Git Version Control
- Restful API's
- MySQL
- Postman

PROFESSIONAL EXPERIENCE

Maqware Solutions   **May 2023 - Present**
Full Stack Developer

Laravel Developer with a strong foundation in Laravel's core principles and tools. Skilled in backend and frontend development using Laravel, Nova, Vue.js, and Nuxt.js. Specializes in API integration via Vuex and building RESTful APIs. Developed Maqware.com in-house website using Nuxt.js, delivering scalable and responsive applications.

Pacslink Corporation   **September 2022 – April 2023**
Software Developer

As a software developer I developed new modules for desktop applications using Java and creating detailed reports with Jasper Reports (iReport) for a medical management system. Additionally, I designed and implemented a comprehensive patient portal, leveraging both front-end and back-end technologies, including a feature-rich dashboard built on Oracle APEX.

PROJECTS

Service Owl
Service Owl is a software platform connecting clients and candidates with agencies through automated workflows and dynamic scheduling. Users (admin, client, nanny) access personalized dashboards with secure permissions to manage shifts, information, and services efficiently.
https://www.serviceowl.ca/

Money Maker
MoneyMaker helps content creators secure and control access to their content with tools like emulator detection, VPN blocking, and geo-targeting. Users unlock content by completing offers, allowing affiliates to earn revenue while ensuring only legitimate access.

Invoice Owl

The project is an invoice generation tool designed to facilitate expense tracking and profit-and-loss analysis. I improved the user experience by enhancing the dashboard with interactive charts and metrics cards displaying key data such as total revenue, overdue invoices, and paid invoices. Utilizing Chart.js and JavaScript,
