SUMMARY

Full Stack Developer with 5+ years building production web applications in Laravel, Vue.js/Nuxt and React. I work across multi-tenant SaaS ERPs, automated data-aggregation pipelines and AI-integrated products, owning features end to end from schema design through API, frontend and deployment. Recent projects have shipped to clients in the United States, Canada and the Gulf.

CORE SKILLS

Languages: PHP 8, JavaScript, TypeScript, Java, SQL / PL-SQL

Backend: Laravel 12, Inertia.js, REST API design, queued & scheduled jobs, Laravel Fortify

Frontend: Vue 3, Nuxt, React, Tailwind CSS, Vite, Vuex, Chart.js

Databases: MySQL, MongoDB, Oracle PL/SQL

Integrations: Stripe, PayPal, AlFatoorah, Telnyx SMS & Voice, OpenAI GPT-4, Google Gemini, WebSockets

Testing & Ops: Pest, Laravel Dusk, GitHub Actions CI, Docker (Sail), AWS, cPanel, Git, Jira, Agile / Scrum

PROFESSIONAL EXPERIENCE

Full Stack Developer | Maqware Solutions, Lahore

May 2023 - Present

- Build and maintain Laravel + Vue/Nuxt applications for international clients across ERP, SaaS, logistics and marketplace domains.
- Architect multi-tenant systems with per-tenant database isolation, role-based access control and subscription-gated feature access.
- Design REST APIs and relational schemas; own queue design, scheduled jobs and third-party service integrations end to end.
- Hold code quality with Pest and Laravel Dusk test suites, Pint linting and GitHub Actions pipelines running lint and tests on every push.
- Work with 6 developers through sprint planning and code review in an Agile/Scrum workflow, delivering 8 client projects to production.

Software Developer | Pacslink Corporation, Lahore

March 2021 - April 2023

- Built desktop and web modules in Java and Oracle APEX for a hospital information system serving 1000+ clinical users.
- Designed and shipped a patient portal dashboard consolidating records, appointments and reports into a single view.
- Wrote complex PL/SQL procedures driving backend data processing and report generation; built medical and operational reports in Jasper Reports (iReport).

PROJECTS

Banyan Capital | Probate lead-generation CRM

Current

Stack: *Laravel 12 - Inertia.js - Vue 3 + TypeScript - Tailwind 4 - Puppeteer - Telnyx - MySQL*

- Built an automated pipeline that aggregates public obituary listings across **8 Florida counties** and enriches each record with property-ownership, probate-court and commercial-property data to qualify real-estate leads.
- Structured 24 county-specific collection services behind a shared controller and service layer, so a new county is added without touching pipeline code.
- Implemented enrichment as queued jobs with scheduled runs, automatic retry of failed enrichments and run-level audit logging.
- Integrated Telnyx SMS and voice for lead outreach, and automated PDF lead reports via DomPDF and Browsershot.

ShiftERP | Multi-tenant SaaS ERP for co-packers & supply-chain teams

shifterp.com

Stack: *Laravel - PHP - React - SQL - Amazon Web Services*

- Engineered a database-per-tenant architecture giving each company fully isolated data storage, with super-admin controlled tenant provisioning and access.
- Delivered subscription-gated modules spanning Customer Management, Inventory, Smart Scheduling, Accounting, Supply Chain and Reporting.
- Deployed and operated on AWS, serving **multiple** tenant companies.

Taif Shipping | Custom ERP for sand-shipping logistics

taif-shipping.testerp.co

Stack: *Laravel - Vue.js - MySQL*

- Built an HRM module with role-based access control across **multiple** roles, plus a financial module covering invoicing, payments, payroll and expense tracking.
- Added real-time operational dashboards giving management shipment and cost visibility in place of manual spreadsheet reporting.

SMS-AI | AI-powered student management system

frontai.testerp.co

Stack: *Vue.js - OpenAI GPT-4 - Google Gemini - WebSockets - Python*

- Built the Vue.js frontend for an LLM-driven template engine with customizable input fields backed by GPT-4 and Gemini.
- Implemented a real-time chatbot over WebSockets and wired a Python API for template version history.

Service Owl | Agency staffing & scheduling platform

serviceowl.ca

Stack: *Laravel - Nuxt.js - MySQL*

- Built permission-scoped dashboards for three distinct user types - admin, client and caregiver - over a shared shift-scheduling and service-management core.

Also shipped: **Invoice Owl** - invoicing and P&L dashboard with interactive Chart.js revenue and overdue-invoice metrics. **Aby Chalet** - Laravel guest-house booking platform with amenity search and AlFatoorah payment integration. **Dulhansdiary** - custom PHP eCommerce platform with Stripe and PayPal checkout. **Money Maker** - content access-control platform with geo- and device-based restriction rules.

EDUCATION

BS Computer Science | Government College University, Faisalabad

2018 - 2022

CERTIFICATIONS

The Complete Software Development Bootcamp - Udemy | API Creation and Testing with Postman
